

TRAFFIC DATA 2017

Edited by Economic Analysis & Airport Charges Dept.

Patrizia Sapia in collaboration with Mara Di Agostino

Table of contents

Terminology	5
-------------	---

Airport Traffic

Ranking of movements, passengers and cargo tables	9
Commercial Traffic	13
Air taxi and general aviation traffic	18
Overall traffic	19
Monthly trend of traffic	20

Traffic by origin-destination

International traffic from/to Italy	27
Ranking of domestic connection	32
Ranking of connections with E.U. countries	36
Ranking of connections with Extra-E.U. countries	45
Distribution of traffic in each airport – E.U. countries	48
Distribution of traffic in each airport – other countries	50

Low cost traffic

Italian airline market share between traditional and low-cost carriers	55
Italian airline market share between traditional and low cost carriers on each airport	56
Ranking of the connections operated by low cost carriers	57

Airlines traffic

Ranking of the first 100 airlines operating in Italy	61
Traffic of the main airlines 2017 vs 2016	63
Ranking of the first 20 airlines operating in Italy	64
The main airlines at major airports	65

Commercial airports – Time series 2001-2017

67-111

TRAFFIC DATA LEGEND

Cargo: airfreight + airmail (stated in tonnes).

Freight: any properties carried on an aircraft, including diplomatic baggage and urgent shipping except mail, in-flight supplies and passenger and crew baggage.

Movement: take-off/landing. According to the airport traffic survey, the arrival and departure of the same aircraft are counted as two movements.

Passengers: departing or arriving passengers from a stopover. Passengers travelling on a domestic connection are counted as one unit-passenger on departure from the airport of origin and as one unit-passenger on arrival at the airport of destination, whereas passengers on an international connection are counted as a single traffic unit in domestic stopovers. Consequently, the overall traffic registered in domestic airports results from the double counting of the number of passengers who have travelled on domestic route, added to those who have travelled on international route counted only once.

Scheduled flight services: air transport services for passengers and freight offered on payment, available to the public and operated according to a published timetable regularity and frequency characteristics as to represent an evident systematic series of flights.

Non-scheduled flight services: flights involving passenger and freight transport based on a rental agreement entered into by one or more parties for the usage of the whole aircraft. If the number of the seats is greater than 19, it is defined as a charter flight, otherwise as an air taxi.

Transits at a specific airport: passengers passing through an airport and departing using an aircraft with the same arrival flight number.

Commercial air transport: air traffic carried out to transport passengers or goods on payment. It, thus, includes airline transport, charter flight and air taxi.

Non commercial air transport or General aviation: transport other than a commercial air transport, essentially including the activities of aero-clubs, flying schools and small private planes, etc.

International air transport: air transport carried out through connections with airports located outside the national boundaries.

National or domestic air transport: air transport carried out through connections between Italian airports.

WLU : Work Load Unit, a load unit equivalent to 1 passenger or to 100 kilograms of cargo.

Airport Traffic

**2017 Ranking of the Italian airports
based on total number of commercial movements**
